

# What is a Pay Pal subscription service?

Simply put, you pay a small amount of money to gain access to a service. Subscriptions typically last in 30 day cycles.

For example, let's say you subscribe to *Michael Buckhoff's Speak Clearly: The Accent Reduction and Pronunciation Course for Non-Native Speakers of American English*. If your payment is processed on March 15, 2010, your service will continue until you decide to cancel the service.

# How do I cancel this subscription service?

You can cancel a subscription up to the day of the next scheduled payment. For instance, if you purchased this service on March 15, 2010, you will need to cancel this service on/before April 15, 2010, that is, if you do NOT want to be billed for a second month of service.

It is required that you use this service at least 1 month, but, if you want to cancel the service after that, you should follow 5 simple steps:

If you want to cancel a subscription:

1. Log in to your PayPal account.
2. Click History at the top of the page.
3. Find the subscription in your History.
4. Click the Details link for the subscription.
5. Click the Cancel Subscription button.

# How long will I need this service?

It depends on how many pronunciation problems you need to solve. Most likely, you will need to use this service for two months. However, for those speakers who already have advanced speaking proficiency and have fewer pronunciation problems to solve, you will most likely only need this service for one month.
